

MEMORANDUM

File Ref STR-9-6-12-174

To: Tracey Gray, Strategic Planner
Copy to: Brett Chapman, Water Services Manager
Date: 4 September 2012
Subject: Water and Sewer Services Proposed for the proposed Omahu North Industrial Zone

You have requested confirmation regarding the proposed Water and Wastewater Services for the proposed Omahu North Industrial Area.

We can confirm that MWH were engaged to consider the options for the water and wastewater servicing of the proposed zone and subsequently to identify a preferred option to be utilised. As the initial MWH proposal failed to consider the source of the water supply and the capacity of the wider water network, Jeff Booth Modeling were subsequently engaged to model the capacity of this network. This work confirmed that an additional bore is likely to be required to service the zone once it is fully developed. The growth related costs of this have been included within the budget for this project.

We can confirm that we are familiar with the services proposed for the zone and consider these to be appropriate for the dry industries anticipated within it.

We are aware of the budgets for these works and can confirm that these have been included within the 2012-2022 LTP and the 2012/3 Development Contributions Policy as appropriate.
